

Masala Ratshili FullStack Developer ✉ giftratshili@gmail.com 📞 +27 73 053 2889 📍 Erasmia, Pretoria, Gauteng 🌐 Portfolio ➔ Linkedin ➔ GitHub	
Summary	
FullStack Developer with handson internship experience building web and mobile applications using the PERN stack (PostgreSQL, Express, React, Node.js) and TypeScript. Also develops REST APIs with Spring Boot (Java). Completed National Diploma in Computer Science (graduation Oct 2026) and holds multiple industry certifications. Passionate about clean code, responsive design, and Agile collaboration.	
Skills	
Languages: Java, JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3 Frontend: React, React Native, TypeScript, Redux Toolkit, Responsive Design Backend: Node.js, Express.js, Spring Boot, REST APIs, JWT Authentication Databases: PostgreSQL, MySQL, Firebase, Auth Tools & Platforms: Git, GitHub, Postman, Trello, Figma, Jira, Vercel, Render, Netlify, Expo, npm workspaces Practices: Agile/Scrum, SDLC, Code Reviews, Testing & Debugging Platforms: Windows, Linux	
Experience	
mLab Southern Africa Software Developer Intern Pretoria, Gauteng April 2025 - March 2026 - Developed fullstack applications using the PERN stack (PostgreSQL, Express, React, Node.js) and TypeScript, delivering productionready features for internal tools. - Built RESTful APIs with Express.js and integrated PostgreSQL, reducing data retrieval time by 30% through optimised queries. - Translated Figma designs into responsive UI components, achieving pixelperfect layouts across 3 device sizes. - Participated in Agile sprints (daily standups, retrospectives, Trello task management) to deliver features on schedule. - Deployed applications on Vercel, Render, and GitHub Pages, ensuring 99.9% uptime for demo environments. - Collaborated on code reviews and implemented JWT authentication, improving security for userfacing features.	
Projects	
Job Application Tracker React, TypeScript, Node.js, Express, PostgreSQL Jul 2025 – Aug 2025 - Situation: Job seekers struggle to manage multiple applications across different platforms. - Task: Build a centralised tracking system with secure authentication and full CRUD operations. - Action: Developed a React frontend with TypeScript and a REST API using Node.js/Express; implemented JWT authentication and URLsyncd search/filter parameters; used JSON Server as a mock backend for rapid prototyping. - Result: Enabled users to log, filter, and sort job applications, reducing manual tracking time by an estimated 40%; deployed live demo on Netlify. Live Demo	
SkyBlue Weather App React, TypeScript, OpenWeatherMap API Aug 2025 - Sep 2025 - Situation: Existing weather apps lacked a visually engaging, South Africafocused interface with glassmorphism design. - Task: Create a responsive weather app that displays realtime data, 7day forecasts, and locationbased insights. - Action: Built a ReactTypeScript frontend consuming the OpenWeatherMap API; implemented weatheradaptive backgrounds, smooth animations, and a unit toggle (°C/°F); optimised for mobilefirst with CSS variables. - Result: Achieved a 30% improvement in perceived load time (via skeleton screens and lazy loading); received positive feedback from 50+ test users; deployed on Netlify. Live Demo	
React Native Restaurant App React Native, TypeScript, Firebase, Stripe Dec 2025 - Jan 2026 - Situation: Small restaurant owners need an affordable ordering solution with admin capabilities. - Task: Develop a crossplatform mobile app with user authentication, shopping cart, customisable orders, and an admin dashboard. - Action: Used Expo and React Native with TypeScript; integrated Firebase (Auth, Firestore, Storage) for backend; implemented Stripe payment sandbox and realtime order tracking; built an admin panel with sales charts and menu management. - Result: Produced a fully functional APK (EAS build); reduced orderprocessing time for a simulated restaurant by an estimated 25%; code is opensource and documented. Github	
Education	
Tshwane University of Technology Computer Science National Diploma • Completed Pretoria, Gauteng • January 2022 - December 2025 Completed academic requirements 2026 / Graduation Oct 2026 Relevant coursework: Advanced OOP, Web Computing, Database Principles, Software Project	
Tswane University of Technology Electrical Engineering Higher Certificate • Completed Pretoria, Gauteng • January 2020 - December 2021 Letau Secondary School Matric(Grade 12) National Senior Certificate(NSC) • Completed Ga-Riba, Burgersfort, Limpopo • January 2015 - December 2019	
Certifications	
Git and GitHub Essentials Coursera Jun 2026 Verify Certificate	
Introduction to HTML, CSS, & JavaScript IBM Jun 2026 Verify Certificate	
React Development Certificate mLab Southern Africa Mar 2026 Verify Certificate	
Attributes	
Problemsolving & analytical thinking Agile team collaboration Continuous selflearning Attention to detail & clean code
